INVESTMENT IN SAMANA WAVES 2

Buying a residence in a building under construction is a step towards earning a living. One of the fastest ways to get guaranteed returns is to close the deal now while the building is under construction. Further resales of real estate will be profitable. As a rule, Dubai's off-plan housing costs increase by 20-30% during the project period. Investors who purchase now can increase their capital as early as the end of 2026.

Buying a property under construction is not only an excellent way to save or earn money in the future but also to get a return on your investment as soon as possible through rental income. A studio's ROI will be approximately 7.66% annually. In contrast, the ROI for the one- and two-bedroom residences will annually be 6.6% and 6.29%, respectively.
